

PLASTER OF PARIS

- **Can be cast, molded, sanded and painted**
- **Hardens in 30 minutes**
- **Plaster or drywall patching material**
- **Non-shrinking**

PRODUCT DESCRIPTION

Custom's Plaster of Paris is a fast setting gypsum based plaster that dries hard within 30 minutes.

USES

- Plaster of Paris is used for casting, modeling, or sculpting forms. It may be cast into any desired form and then painted for hobby or art projects.
- Plaster of Paris may also be used for light duty repair of plaster walls and ceilings.
- It may be drilled, sanded and/or painted.

SURFACE PREPARATION FOR PATCHING

Surface must be clean, dry and firm. Remove dust, loose material and grime. Open cracks to lock-in patch by cutting an inverted "V". Dampen patch area with water prior to application.

MIXING

Combine desired quantity of Plaster of Paris with cool, clean water and mix to a smooth paste consistency. Always use clean tools and mixing container. A mixture of 8 oz. (237 ml) water to 1 lb. (.45 kg) powder is recommended. Do not overthin. Avoid mixing more material than may be used within 20 minutes. For patching, mix approximately 6 oz. (177 ml) water to 1 lb. (.45 kg) powder.

APPLICATION

For casting, pour smooth mixture into mold. Pack mold with putty knife to eliminate air pockets and ensure adhesion to casting form. Carefully release from mold to avoid damaging cast. For light duty patching, pack Plaster of Paris into void. Finish flush with surface and match existing texture if necessary. Material will set within 30 minutes.

DRYING TIME

30 minutes.

CURING

1 hour.

CLEAN-UP

Clean tools with water before Plaster of Paris hardens.

STORAGE

Keep from freezing. Store in a cool, dry area.

CAUTION

Wear rubber gloves and eye protection. Avoid prolonged contact with skin. This product may develop sufficient heat to cause burns if a large mass, such as a cast of a hand or arm, is allowed to harden in contact with the skin. Keep out of reach of children. Do not take internally.

Warning: This product contains one or more chemicals known to the State of California to cause cancer.
