

# TILELAB®

## MARBLE REFINISHING KIT

- Removes light etching, water marks, glass rings and dullness
- Restore mirror-like shine to polished stone by hand
- Excellent for vanities, tables, spot repairs

### PRODUCT DESCRIPTION

The Marble Refinishing Kit includes everything needed to renew polished stone surfaces by hand. Perfect for spot repairs and small jobs, such as table tops, vanities and decorative fixtures. Removes water marks, dullness and light etching and restores the lustrous finish.

### USES

Polished marble, travertine, limestone, onyx, terrazzo (calcite stones). Not formulated for use on granite.

### SURFACE PREPARATION

The surface must be clean, dry and free of wax, coatings or finishes. TileLab® Heavy-Duty Cleaner & Stripper will clean the surface and remove any wax or acrylic finishes.

### DIRECTIONS

1. Shake Polishing Creme #1 well and apply it to the area to be polished. Use about 1/2 teaspoon (2.5 ml) per 6" (15.2 cm) diameter area.
2. Attach polishing pad to pad holder. Rub the creme vigorously and rapidly into the stone with a circular motion. Continue rubbing for approximately fifty strokes.
3. Immediately clean the creme off the stone with a wet sponge or cloth. Ignore any new haze or film that may have appeared on the stone, it will disappear when polishing is complete. Inspect the stone to check the effect of the treatment. Repeat the process if surface defect hasn't been removed.
4. Shake Polishing Creme #2 well and apply it to the area just polished with Creme #1. Use about 1/2 teaspoon (2.5 ml) per 6" (15.2 cm) diameter area.
5. Attach new, clean polishing pad to pad holder. Rub the creme vigorously and rapidly into the stone with a circular motion. Extend your polishing beyond the border of the area previously polished with Creme #1 to blend the restored area with the untreated area. Continue rubbing for approximately fifty strokes.

6. Immediately clean the creme off the stone with a wet sponge or cloth and wipe dry. To keep your newly restored, natural stone clean and stain-free longer, seal the surface with TileLab SurfaceGard® Penetrating Sealer according to label directions before proceeding to Step 7.
7. Shake StoneGloss™ Polish well. Apply a few drops – about 1 teaspoon (4.9 ml) per 4 square feet (.37 sq. m) to the entire surface and spread with a soft, lint-free cloth. Apply sparingly; only a small amount is needed.
8. Allow to dry until a haze forms. Then buff surface to a shine with the cloth provided. Buff lightly and rapidly in a circular motion.

### CLEAN-UP

Rinse the polishing pads thoroughly with warm water and allow to dry for future use. If stone surface is used for food preparation, clean refinished area thoroughly with TileLab Marble & Stone Cleaner or Concentrated Tile & Stone Cleaner.

### PACKAGING

Kit Contains: (1) 4 oz. (118.3 ml) bottle Polishing Creme #1, (1) 4 oz. (118.3 ml) bottle Polishing Creme #2, (1) 1 oz. (29.6 ml) bottle StoneGloss™ Polish, (2) white nylon polishing pads and holder and cotton buffing cloth.

### ITEM CODE

TLMRK

### CAUTION

Keep out of reach of children. Harmful if swallowed. Do not induce vomiting. Give plenty of water and call a physician immediately. If eye contact occurs, flush immediately with plenty of water for 15 minutes. If contact with sensitive skin occurs, wash with soap and water. Call physician if necessary. Do not mix with other solutions. Keep from freezing.
