

REDGARD® WATERPROOFING AND ANTI-FRACTURE MEMBRANE RECEIVES IAPMO CERTIFICATION

RedGard® Waterproofing and Anti-Fracture Membrane received IAPMO/Uniform Plumbing Code certification for use as a shower pan liner, File No. 4244. Installation requirements are the same as for use as a waterproof membrane.

RedGard also meets ANSI A118.10 for load bearing, bonded, waterproof membranes for thin-set ceramic tile and dimensional stone installations. It's a water-based, ready-to-use, elastomeric waterproofing and anti-fracture membrane. It is easily applied with roller, trowel or sprayer producing a continuous moisture barrier with outstanding adhesion.

RedGard may be used for interior or exterior commercial and residential tile installations. Areas of use include vertical and horizontal applications requiring integral waterproofing such as steam rooms, shower pans, spas, countertops, balconies, kitchens and virtually anywhere a waterproofing material is specified. Its elastomeric properties allow it to be used as a crack isolation membrane.

Please contact Technical Services if a copy of the IAPMO certificate is required.
